## Experience

---

### Mostqel | Remote

#### Software Engineer | 02/2020 - Present

Experienced Freelance Full Stack .NET Developer with a strong track record of delivering impactful projects. Specializing in the .NET stack, I have successfully worked remotely as a freelance developer at Mostqel since 2020.

#### Recent projects:

-Stock and Mutual Fund Portfolio Management: Created a responsive web application to manage stock and mutual fund portfolios. Integrated real-time market data and developed a set of rich graphs for comprehensive data visualization. Implemented a custom API to access market data and ensured cross-browser compatibility for seamless usage across devices utilizing the .NET core. [Github](#)

- MERN Stack E-Finance: Developed a dynamic financial application that combines the power of the MERN stack with machine learning. Implemented robust security measures and prioritized a user-friendly interface for efficient financial management. [Github](#)

Confident and dedicated, I bring a wealth of experience and a passion for creating exceptional software solutions in the .NET ecosystem.

## Skills

---

.NET Core, Design Patterns, ReactJS, REST, Java, HTML, CSS, JavaScript, RESTful APIs, MYSQL, PHP, Problem Solving, Sass (Syntactically Awesome Style Sheets), Microsoft Office, Cloud Technologies

## Education

---

### University of Greenwich - MSA University | 6th of October city, Gz

#### BSc. In Computer Science | 02/2022

• Related courses: Database System, Operating System, Data Structures, Design and Analysis of Algorithms, Object-Oriented Design

### Msa University | 6th of October city, Gz

#### Java industrial training | 02/2021

Certified in Object-Oriented , Threads and shared object , Network programming .

## Graduation Project

---

### Therapy chatbot —Graduation project-Grade : A

link: [Github](#), AI chatbot for people with mental illness Python, Laravel, HTML, CSS,JS

## Awards

---

**Vodafone** Before Graduation I did work at VOIS and got the Power of the people Award.
